Pigminted

I'm hungry.
I don't know what to eat.

I think...
You should eat some food.
Try something local.
And something you're in the mood for.
That should narrow it down.

OMG you're no help at all!

What are you talking about? The universe is like billions of planets....I've single handedly narrowed it down by 99.999999%

.....

I hate you sooo much.
